Reading Week

To inculcate the love of reading in our students, we organized a reading week for grades I & II. Students went through different activities on alternate days, taking an oath to become a good reader and spend time reading daily. They read their favourite bedtime story and wrote a review on it. Their reviews were pasted on the "My Review Wall." This was followed by a visit to the library, where students selected their favourite books and got them issued. These books were then used to set up a class library.

Kahoot Workshop for Parents

If we want our children to be digitally literate, we have to make our parents aware of all the new technologies too. We conducted an informative workshop for the Kahoot app. Parents appreciated it a lot as the students learnt their concepts through this interesting way.

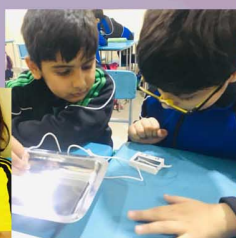

National Compliment Day

On National Compliment Day, students first received compliments by their teachers and later they pasted their compliments, for their favourite teachers and friends, on the "Wall of Wonder," especially designed for this purpose.

Learning Through Fun

Our classes provide such a conducive environment to the students that they explore, investigate and reach a conclusion. In this session, students learnt through various class activities of Science, English and RSM specifically.

Assemblies Arena

Stage performance makes a child confident to speak on any platform in their future life. Our students showed their mettle in their assemblies. Here are a few glimpses.
